

SRAVANTHI PRODDATOORI

Software Engineer | Java · Spring Boot · REST & GraphQL APIs · Cloud
psravanthi0505@gmail.com | +1 (703)-554-0414 | [LinkedIn](#) | [Google Scholar](#)

PROFESSIONAL SUMMARY

Software Engineer with 3+ years building scalable Java backend applications and REST/GraphQL APIs using Spring Boot, Spring MVC, and Spring Data across microservices architectures on GCP/AWS. Practices Test-Driven Development, CI/CD automation, and AI-native engineering with LLM coding assistants such as GitHub Copilot. Writes clean, object-oriented code and collaborates with cross-functional Agile teams to deliver reliable, high-performance production services.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Backend & APIs: Spring Boot, Spring MVC, Spring Data JPA, REST APIs, GraphQL, Microservices

Cloud & DevOps: Google Cloud Platform (GCP), AWS, Docker, GitHub Actions, CI/CD

Testing: Test-Driven Development (TDD), JUnit, Integration & API Testing, Jest

AI-Native Engineering: GitHub Copilot, LLM APIs, Generative AI, Prompt Engineering, ML

Databases / Frontend: MySQL, MongoDB, Query Optimization · React.js, Vue.js, Node.js

Security / Practices: OAuth2, JWT, RBAC · Agile, Code Reviews, OOP, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

Software Engineer

Feb 2025 – Present

Pertech Industries Inc.

- Designed and maintained scalable Java-based **REST and GraphQL APIs** for a cloud-native healthcare platform using **Spring Boot** and **Spring Data**, improving responsiveness and system reliability.
- Built secure, production-grade backend **microservices** with Java, Spring Boot, **Spring MVC**, and SQL following **object-oriented programming** principles and team standards.
- Applied **Test-Driven Development (TDD)** with **JUnit** unit tests and API integration tests to reduce production defects; conducted peer **code reviews**.
- Optimized SQL queries, indexing, and service-layer logic to reduce API response times; secured applications with OAuth2, JWT, and RBAC.
- Leveraged **AI-native engineering** tools (GitHub Copilot / LLM assistants) to accelerate coding, refactoring, and testing; deployed containerized apps via **Docker** and **GitHub Actions CI/CD**.

Software Engineer

Jan 2023 – Dec 2024

Old Dominion University (VMASC)

- Developed scalable web applications and backend services using Java, **Spring Boot**, **Spring Data JPA**, **REST APIs**, and **microservices** following object-oriented design.
- Built RESTful APIs supporting frontend applications with efficient SQL interactions; participated in **Agile** sprints, **code reviews**, and testing.
- Developed secure backend services following Zero Trust principles; designed a SARSA-based reinforcement learning model for autonomous navigation in RF environments.

Associate Software Engineer

Jan 2022 – May 2022

DAZN

- Built scalable backend services (Node.js) and React.js frontend in an **event-driven microservices architecture**; integrated Apache Kafka for real-time streaming, boosting transaction success to 80%+.
- Implemented OAuth2 with JWT across microservices, enforcing RBAC, token lifecycles, and end-to-end encryption aligned with enterprise security policies.

EDUCATION

Old Dominion University — M.S., Computer Science

GPA: 3.8

Vasavi College of Engineering — B.E., Electronics and Communication Engineering

GPA: 3.6

RELEVANT PROJECTS

- Voice-Controlled Web Archiving Assistant** — Full-stack app (Java, **Spring Boot**, **REST APIs**, JS, ML-based NLP); 95% command recognition accuracy, 40% faster navigation, validated via A/B testing with 50+ users (85% satisfaction).
- AI Resume Optimizer & ATS Analyzer** — **Microservice-based AI platform** (React, Node.js, **LLM APIs**, vector embeddings, semantic search) generating job-specific resume recommendations and ATS compatibility analysis.
